2. Citations and explanations (Rule 70.7)

Document 1: JP 2003-241311 A

Document 2: JP 2003-156711 A

Document 3: JP 49-063452 A

Documents 1 to 3 cited in the international search report do not disclose or suggest the configurations that are set forth in amended claim 1, wherein the "respective areas...for shielding the plurality of lenses from light include different areas" and "when the areas of the openings change, the image upon the surface where the light that has been generated by the aforementioned light source is projected exhibits a more or less uniform change in illumination intensity."

Such being the case, it is impossible to deny the novelty and inventive step of the inventions that are set forth in claims 1 to 5 and 7 to 10 in relation to the documents that are cited in the international search report.
